

Create virtual network

The Microsoft Azure Virtual Network service enables Azure resources to securely communicate with each other in a virtual network which is a logical isolation of the Azure cloud dedicated to your subscription. You can connect virtual networks to other virtual networks, or your on-premises network. [Learn more](#)

Name * ✓

Address space

The virtual network's address space, specified as one or more address prefixes in CIDR notation (e.g. 192.168.1.0/24).

<input checked="" type="checkbox"/> Address range *	Addresses	Overlap	
<input checked="" type="checkbox"/> <input type="text" value="10.0.0.0/16"/>	10.0.0.0 - 10.0.255.255 (65536 addresses)	None	...
<input type="text"/>	(0 Addresses)	None	

Subnets

The subnet's address range in CIDR notation. It must be contained by the address space of the virtual network.

<input checked="" type="checkbox"/> Subnet name	Address range	Addresses	
<input checked="" type="checkbox"/> <input type="text" value="mysubnet"/> ✓	<input type="text" value="10.0.0.0/24"/> ✓	10.0.0.0 - 10.0.0.255 (256 addresses)	...
<input type="text"/>	<input type="text"/>	(0 Addresses)	

- Click create virtual network
- Give name
- Assign the ip range
- Give name for sub net assign ip range
- Click review and create
